

TO BRING ON WHELPING

If you have a bitch who goes into uterine inertia in mid-whelp, or can't seem to “get started” with pushing out her puppies, the following recipe is reputed to bring on good contractions within 20 minutes of feeding it:

2 whole eggs (or 2 tablespoons of egg substitute, such as EggBeaters)
1 tablespoon sugar
½ cup milk

Mix the ingredients thoroughly, so the sugar is dissolved and the eggs are completely broken down into the solution. Feed the bitch all of it, or at least as much of it as she will take. This recipe should help initiate contractions within 20 minutes.
