

Recipe to Perk up Tired Dams

From Myra Morrison, Jubilee Pugs

For the Mums when their energy is lagging and they need a pick me up (it probably stimulates more milk production for her too).

1 can Evaporated milk
1 egg yolk (raw)
2 TBSP honey
1 packet of unflavored gelatin

Run it through the blender and refrigerate it. I like to put a little on the Mum's food about 4 weeks into the litter when she can't get enough calories.

I also like to mix this recipe with the puppies' weaning staple regardless of whether it is ground kibble or minced raw ground beef. It can also be given to them in a bottle or by a feeding tube.
